

Helping Our Customers Build Sustainable Solutions

ComNet Communications is committed to sustainability, integrating eco-conscious practices at every level of our operations. From designing and deploying energy-efficient solutions for clients to minimizing our environmental footprint, we take a comprehensive approach to building a greener future. In the office, we champion eco-friendly practices by reducing waste, recycling materials, and utilizing energy-efficient lighting and equipment. Sustainability is central to our mission as we work to create a future where innovation and environmental stewardship go hand in hand.

Sustainability Services:

- Integrated systems for energy-efficient buildings
- Thermostats, Shades & Cooling Systems
 - Environment Sensors
 - CO2 & Leak Sensors

Sustainability Practices:

- Cable & Copper Recycling
- Warehouse Efficiency: minimizing multiple shipments to reduce our carbon footprint
- Cardboard & Packaging Recycling

We actively promote sustainability throughout the design and deployment process, ensuring our solutions conserve resources while delivering cutting-edge technology.

SUSTAINABILITY IN OUR OFFICES

- ✓ Recycling Program: Bins for paper, cans, bottles, plastics, glass, and cardboard.
- ✓ Digital Transition: Going paperless with digital invoicing and pay stubs.
- ✓ Upcycling Office Supplies: Encouraging creative reuse of supplies.
- ✓ Reusable Items: Reusable mugs and cups to cut down on single-use plastics.
- ✓ Vacancy Switches: Installed in offices, hallways, and public spaces to reduce energy use when spaces are unoccupied.
