

The right choice TO CONNECT YOUR BUSINESS

WIRELESS SERVICES

In today's world of mobility, ComNet understands that poor reception in office buildings, public spaces, airports and hospitals can lead to missed calls, missed opportunities, and loss of revenue. The need for continuous and robust wireless coverage is critical for employees to be efficient and effective. ComNet can deploy a complete, end-to-end, managed wireless solution that provides consistent performance across the network.

ABOUT US

For over 30 years, ComNet Communications LLC has been installing and maintaining mission-critical network infrastructure systems for enterprise companies. In addition to traditional voice/data cabling, we have developed the capabilities and reputation as an industry leader for data center, audio visual, physical security and wireless installations.
